Trans. of Zeitschrift für Physik (West Germany) 1956,
v. 145, p. 597-610.

DESCRIPTORS: *Selenium rectifiers, *Selenides,
Cadmium compounds.

It was found experimentally that the two structures of
the CdSe, i. e. the cubic and the hexagonal one, behave
differently with respect to placement of the excess Cd.
At the cubic CdSe the placement of excess Cd in the
lattice will cut down the electric resistance more than
this is the case for the hexagonal CdS. One may raise
or lower at will the electric resistance by tempering
the samples in Se or Cd vapor, respectively. Accord-

A doping apparatus is described which permits the
production of vaporized layers of several components.
This doping apparatus consists of a rotor equipped
with two or more vaporizers and permits great varia-

DISTANT RESULTS OF ESOPHAGO-GASTROSTOMY
IN CARDIOSPASM. [1961] 8p.

Trans. of Sovetskaya Meditsina (USSR) 1955, v. 19,
no. 2, p. 62-65.

DESCRIPTORS: *Surgery, Stomach, Esophagus,
Dilatation, Thorax, *Hernia, *Diaphragm.

The distant or late results in the 3 cases of trans-thoracic esophago-gastrostomy performed for cardiospasm were good. There must be taken into account the fact that a portion of the stomach has been moved into the pleural cavity. Remembering this, will help in preventing such diagnostic errors as pleurisy and, if effusion does develop, complications of pleural puncture can be prevented.
